

### Integration Solutions

The integration consultants of Computer Solutions focus on optimizing communication processes and integrating applications. We develop easy accessible software solutions to generate more turnover, to increase efficiency or to lower costs for our customers and their business partners.

Electronic data exchange provides a more efficient, faster and cheaper way of communication. With our SaaS-solution **TransMessage** we completely and 24/7 take care of your electronic data communication with your business partners.

In addition we advise about application integration and implementing middleware, and is an on-site implementation of the open source integration platform **FUSE**, for application integration or a service oriented architecture (SOA), also possible.

## e-Invoicing

These days **information** is available electronic everywhere, in financial- and production systems, networks and even at different locations of an organization. The exchange of information however, often takes place through paper. Orders, invoices and reports usually are sent by post between companies and within organizations.

Electronic data exchange of e.g. **invoices**, provides a faster and cheaper way of communication. You will achieve for your company as well as your business partners:

- lower administrative costs
- shorter process times
- faster payment of invoices
- less process- and administrative mistakes
- saving our environment

With our SaaS-solution for **e-invoicing** your invoices are electronically sent to your business partners (B2B), the government (B2G) or consumers (B2C) with:

- providing invoice data in different formats, like: XML, EDIFACT, CSV, Text and Excel
- sending invoices in different formats, like: PDF, XML, EDIFACT and UBL
- communication techniques like (S)FTP, E-mail and HTTP(S)
- overview of archived invoices

Processing data from the sending application, or processing data into the receiving application, are usually already integrated in your business applications.

Additions to the standard solution are also possible:

- digital signing PDF invoices
- integrating iDEAL payments

Figure 1: e-invoicing concept

In spite of full electronic communication, provided data can also be transformed to **digital documents** in PDF format and send by e-mail or published on a web portal.

**Services** on our specialism business integration regarding e-invoicing we offer you as:

- SaaS implementation e-invoicing
- standby service e-invoicing
- consultancy business integration (e.g. *recommendation regarding e-invoicing, processing invoice data*)
- software development business integration (e.g. *programming processing invoice data*)
